FEB 2016 - OCT 2018, HYDERABAD

Involved in POC, development and integrating the product with new technologies, developing client-specific feature request, maintaining product stability, resolving development-related customer issues.

---

**Vasudhaika Software Solutions / Software Design Engineer**  
AUG 2013 - JAN 2016, HYDERABAD

Designing and implementing RESTful web services including URI design for resources, models for API services, writing custom exceptions for handling anomalous cases, writing a unit test and integration test for functionality of the services.

---

—  
**Education**

**University Of Hyderabad / MCA**

JULY 2010 - JUNE 2013, HYDERABAD

I did a Master in Computer Application and scored 7.6 CGPA. I was a member of the IEEE committee. Became a winner of DCIS tech quiz.

**St Columba's College / B.SC.**

JUNE 2007 - MAY 2009, HAZARIBAGH

I did a Bachelor of Science in Mathematics(Hons) and scored 68%.

---

—  
**Skills**

**Java Technologies** - Core Java Libraries, J2SE(Collections, JDBC), Java Web Services(JAX-RS, Jersey framework), Hibernate, Servlet, Spring core, Spring boot, Mockito.

**Web Essential** - HTML, CSS, JavaScript, JQuery, XML, JSON.

**Databases** - MSSQL, MySQL, Postgres, MongoDB, DynamoDB.

**Version Control Tool** - GitHub, Bitbucket, Perforce.

**Project Management Tool** - Jira, Confluence.

**Methodologies** - Agile Scrum.

**Build Tools/IDE** - Ant, Maven, Gradle, Eclipse, IntelliJ.

**Operating Systems** - Ubuntu 12.04 LTS, WINDOWS, macOS High Sierra.

---

—  
**Projects**

**Fusion-GRC / Oracle**

NOV 2018 - PRESENT

Oracle Fusion Governance, Risk, and Compliance is part of Oracle Fusion Applications, which are completely open standard based enterprise applications that can be easily integrated into a service-oriented architecture. Designed as a complete suite of modular applications. Oracle Fusion GRC delivers concrete benefits to organizations no matter where they stand along the maturity curve.

**Portal / OpenText**

FEB 2016 - OCT 2018

OpenText Portal creates engaging websites and composite applications with rich content and aggregated applications to support personalised interaction with customers, employees, suppliers and partners. Portal provides a highly scalable and efficient means of aggregating content and applications for use across a variety of initiatives inside and outside the firewall.

**Social Microservice / OpenText**

NOV 2017 - OCT 2018

It's a collection of different microservices, which is built over the concept of RESTful web service. It provides independent microservices to manage user's social activities. Social Microservice is an implementation of W3C recommended Activity Streams 2.0 vocabularies that detail the structure of activities, and define specific types of activities that can be performed by a user.

**Kalgudi / Vasudhaika Software Solution**

AUG 2013 - JAN 2016

Kalgudi is the next-generation platform for MSME where users can conduct their daily business with the trusted network of their own suppliers, customers and business professionals.

Kalgudi Provides -

1. myBusiness : It facilitates user to manage multiple businesses at one place.
2. myAccounts : Integrates business processes and Accounting systems to increase accuracy in reporting and eliminates human effort.
3. myConnects : This will work as social media to connect business people from different places and they can post the messages.
4. myContent : The main theme is "Right Content and Right Decision". Contains info regarding user business like daily price of the commodity, Minimum Support Price, Weather News, Market Info etc.
